

What I want to be when I grow up

I want to be a dentist when I grow up. But you may ask me why I want to be a dentist. Well, I want to be a dentist because I want to help people who have problems with their teeth.

If I become a dentist, I'll repair people's teeth. I'll also teach people how to take care of their teeth. I'll work with assistants who will help me to take care of the patients and pass me tools. I'll also work in a dental clinic.

Dentists need to be patient, caring and attentive. They also need to be smart so that they can memorize all the treatments.

I think I am suitable for this job because I am patient and caring, and I am also smart. If I can be a dentist, I'll be happy because it is my dream job.
