

What I Want to Be When I Grow Up

When I grow up, I want to be a computer programmer because I really like to program computers and find bugs.

If become a computer programmer, I will program computers to learn new and different things. I can work in my home, or my office. I can also work with other programmers.

Computer programmers need to be hard-working and patient so that they can program electronic devices and find bugs.

I think I am suitable for this job because I am patient, hard-working and I learn fast. From now on, I am going to read more books about computer programming.

I hope I can be a computer programmer some day.
